# History of Lumiere

It would seem that the cinema was a good idea:  
a huge building in the city center,  
two spacious halls, plenty of space  
for a cafe - take and do business.

Only in 2003 was there a brave person who took the risk - **Lydia Shkrebyak**. The idea to restore the cinema belonged to her sister - **Maria Shkrebyak**. The project was made by the architect **Bohdan Savka** in **art deco** style.

When the reconstruction was completed, they began to think about the design. Everything rested on the name. Many options were considered: "Premiere", "Kinohon", "Cinema". We stopped at "Lumiere". Reconstruction lasted three years. And now they can go watch movies and enjoy free time.
